<sup>1</sup> The “Price Decline” is the peak-to-trough percentage change in the price of executed transactions, *i.e.*,  $\frac{x}{y} - 1$ , where  $x$  is the lowest transaction price over the two minutes preceding the Executing Purchase to the two minutes following the Executed Purchase and  $y$  is the price of the Executing Purchase.

<sup>2</sup> For each of these, the price of the Executing Purchase is below the calculated best offer prior to the Executing Purchase.

<sup>3</sup> The volume of Baiting Orders for a Spoofing Episode is defined as the lesser of the volume of sell-side orders cancelled in the two minutes after the Executing Purchase and the volume of sell-side orders created in the two minutes prior to the Executing Purchase (*i.e.*, the sell-side orders cancelled within two minutes after the Executing Purchase whose aggregate volume was created within the two minutes prior to the Executing Purchase). These terms are defined as in the Amended Complaint.

<sup>4</sup> The market impact of a Baiting Order is the same regardless of whether a Defendant cancelled that specific Baiting Order or another order placed by that Defendant on the over-the-counter markets. For this reason, prices for Baiting Orders reflect those orders cancelled after an Executing Purchase.
